Course	Programme corresponded with information provided in the course description?	How do you evaluate the quality of the performance of the course leader?	How do you evaluate the teaching materials of your course?	How do you assess the difficulty level of the course?	Did the course meet your expectations?	Would you recommend the course to others?	How would you rate the course on a scale from 1 to 10?	Do you have any comments or suggestions about the course content, teaching materials, course organization and/or course leader?
Process Tracing Methods: An Introduction	10	10	10	7	10	10	10	I have received great individual feedback from Hilde, progressing my phd work
Process Tracing Methods: An Introduction	10	10	10	8	10	10	10	The proportion between lectures, discussion, and exercises are perfectly structured. The amount of knowledge is huge, the course is really condensed, but was well-conveyed by the professor.
Process Tracing Methods: An Introduction	10	10	9	7	10	10	10	Excellent course and teacher.
Process Tracing Methods: An Introduction	10	10	10	6	10	10	10	I really enjoyed working on our own projects, as it really helped me to structure my thoughts and answered questions I had. Hilde is a very approachable, highly qualified and funny teacher.
Process Tracing Methods: An Introduction	10	10	10	5	9	10	10	/
Process Tracing Methods: An Introduction	10	10	8	7	10	9	9	Shoutout to Hilde, her energetic style complemented a well structured course. Bravo. One thing I would suggest for next editions: it would have been beneficial to receive the readings at least two weeks prior to the beginning of the summer school. I had limited time to read them the week before due to other work commitments and would have appreciated having more time beforehand. The time during the course week is indeed not enough to complete the readings, especially if one decides to do the assignments. Apart from this, everything went really smoothly.
Process Tracing Methods: An Introduction	10	10	9	4	10	10	10	It may be helpful to know in advance that the course includes a lot of overlaps between Process Tracing and other qualitative methods - as I know that my home institution is quite critical of e.g. QCA and I will likely have to defend its relevance to PT. But I personally really appreciated it, learned a lot and found it a really helpful connection of abstract and specific things applied to my own research. it made me feel much more secure and confident in my understanding of methods, and also helped me conceptualise how I want to teach and engage with students and their projects.
Process Tracing Methods: An Introduction	8	9	9	7	8	9	9	
Process Tracing Methods: An Introduction	9	10	8	8	10	10	9	Fantastic training, on very good level, High level for expert, yet still accessible for 'new to the field' people. Very good combination of literature, and getting the slides and notes from the white.
